TURQUOISETM STONE

0006

Because of its hardness ROCKY MOUNTAIN QUARTZITE TURQUOISE STONE veneer is "fitted" into a wall pattern with a minimum of trimming and shaping. The result is a beautiful natural appearance which adds design refinement to any project.

Please write or call if you wish to receive our detailed recommendations for installation.

ROCKY MOUNTAIN QUARTZITE TURQUOISE STONE is available in a variety of shapes and sizes for special applications. Listed below are the standard grades produced.

TYPE	APPROXIMATE DIMENSIONS	APPROXIMATE COVERAGE SQ. FT. PER TON
veneer	2" - 5" Thickness, 8" to 4 sq. ft. Surface Dimension	30 - 45
* PAVERS	1" - 3" Thickness, 8" to 4 sq. ft. Surface Dimension	70 - 80
LEDGE STONE	2" - 8" Heights, 4" - 7" Depth, 8" - 18" Length	30 - 40
LANDSCAPE BOULDERS	100# to 8 Tons	N/A

* Limited Availability

In addition to the above products, we supply a number of specialty items and crushed aggregate products. Your requests for information and samples will be promptly answered.

Note: Due to the variables in natural stone, please pre-select the stone you wish to use from your local dealer. When we send samples please consider that these are an average range of color and texture.

TECHNICAL INFORMATION

ROCKY MOUNTAIN QUARTZITE TURQUOISE STONE is an exceptionally hard, metamorphic, stone colored by various elements such as chromium, manganese and iron oxides. It is very hard 6 to 8 on MOH scale of 10, weighs 160 to 170 lbs. per cu. ft., has a negligible porosity and no absorption. Compressive strength varies from 30,000 to 50,000 psi. **ROCKY MOUNTAIN QUARTZITE TURQUOISE STONE** will stay clean! It is so hard that there is practically nothing that will stain it permanently.

ROCKY MOUNTAIN QUARTZITE has all of the best qualities found in natural stone. **EXTREMELY HARD** - will not flake off or weather under the most extreme conditions. **COMPLETELY NON-POROUS** - very easy to clean and keep clean. **COMPLETELY UNFADING** - forever. **NATURAL COLORS** - nature's palette allows for unlimited design possibilities.

CLEANING AND SEALING ... Ideally, all stone work should be cleaned with clear water as the work progresses. When it is necessary to remove dry mortar stains, a dilute muriatic acid solution or other masonry cleaners may be used to clean **ROCKY MOUNTAIN QUARTZITE TURQUOISE STONE** without harmful effects to the stone.* Because of the complete non-porous nature of **ROCKY MOUNTAIN QUARTZITE TURQUOISE STONE**, sealers are not necessary to protect the stone.

BELOW & RIGHT: **ROCKY MOUNTAIN QUARTZITE FLAGSTONE**. The soft neutral colors and maintenance free factors make this beautiful flagstone the choice of the most discriminating designer. **ROCKY MOUNTAIN QUARTZITE FLAGSTONE** is the ideal stone for exterior applications in any climate since it is completely stain resistant, fade proof and frost proof under the most severe conditions. Its unique non-skid quality makes it ideal for swimming pool decks, entry ways, stair treads, etc.

LEFT: By using **ROCKY MOUNTAIN QUARTZITE FLAGSTONE** as a thin veneer, it is possible to transform the most drab structure to a thing of beauty and permanence for surprisingly low initial cost. It will pay for itself in a few short years through lower maintenance costs, stable value and prestige.

ROCKY MOUNTAIN QUARTZITE THIN VENEER is an ideal solution when weight or economy are vital factors. $\frac{1}{4}$ "- $\frac{3}{4}$ " thick grade averages only 8 lbs. per sq. ft. and $\frac{3}{4}$ "- $1\frac{1}{4}$ " thick grade averages 13 lbs. per sq. ft.

By combining more than one type of **ROCKY MOUNTAIN QUARTZITE** on the same job it is possible to achieve striking effects with the same basic type of stone and color tone.

BOTTOM LEFT: A beautiful example of **ROCKY MOUNTAIN QUARTZITE HONEY LEDGE STONE** and $\frac{1}{4}$ "- $\frac{3}{4}$ " **THIN VENEER** blended together to create a pleasing and harmonious piece of modern architecture

Build for strength, permanence and beauty. Be sure to specify **ROCKY MOUNTAIN QUARTZITE**. It is your guarantee.
